6. Orthography

No standard exists, but the Συντυχιές project (Katsoyannou, Armostis, Christodoulou, Themistocleous) published the most explicit convention, which writes geminates and marks postalveolars, while current ASR data (Common Voice el-CY) uses plain Greek letters without the breve, so the tutor needs a normalisation table mapping both.

9. Existing tools

Openly licensed CG-capable tools now exist for speech recognition (myned-ai Parakeet, CC BY 4.0) and for text dialect identification (hb20007 classifier, MIT), github plus one small Greek to Cypriot LLM fine-tune huggingface under the Llama 3.1 licence, while no CG treebank, spell-checker, morphological analyser or TTS system was found.
